**COOK TEST:** This represents a close relationship to Digestability. It represents those ingredients which are starches/carbohydrates and represents how well those were cooked by the extruder.

Anything above 85% is good. Above 90% is great. Above 95% is excellent. Pureluxe generally falls between 90-98%.

If you see "cook / gelatinization " under 80% then it could lead to dietary issues with your pet as the ingredients such as Peas, Lentils, Potatoes, Rice, Sorghum, Corn etc.... "starches" were not cooked well enough for the pet to digest efficiently.
