NATUROX is the Leading Natural Preservation Brand in the pet food industry.

For more than 12 months preservation we should exceed 20ppm for each 1% of fat in the diet  
This diet has 18% so we should have at least 360ppm - we exceed this by 7%

All other Non-Natural Preservatives tested are at the MINIMUM level the laboratory tests.

1ppm = 0.0001%  
5ppm = 0.0005%  
Clearly this indicates the non-use of such chemical preservation.
